Review

New pipeline

## Review your pipeline YAML

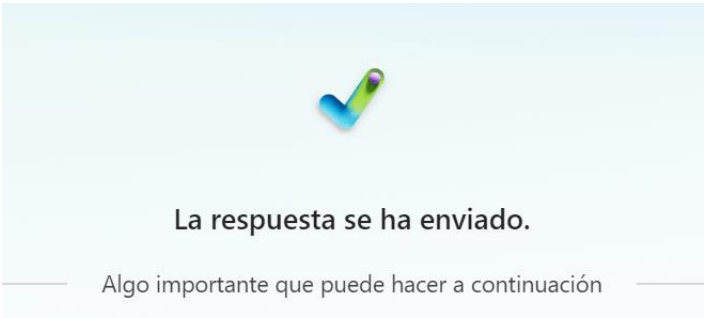

sample02 / azure-pipelines.yml

```
1 # ASP.NET Core (.NET Framework)
2 # Build and test ASP.NET Core projects targeting the full .NET Framework.
3 # Add steps that publish symbols, save build artifacts, and more:
4 # https://docs.microsoft.com/azure/devops/pipelines/languages/dotnet-core
5
6 trigger:
7   - main
8
9 pool:
10  vmImage: 'windows-latest'
11
12 variables:
13   - solution: '**/*.sln'
14   - buildPlatform: 'Any CPU'
15   - buildConfiguration: 'Release'
16
17 steps:
```

×

Job

```
1 ##[error]No hosted parallelism has been purchased or granted. To request a free parallelism grant, please fill out t
2 Pool: Azure Pipelines
3 Image: windows-latest
4 Started: Just now
5 Duration: 1m 50s
6
7 ▶ Job preparation parameters
```

3.8 Cambiar el tipo de proceso de

Basic a Agile

Change the project process

×

Change the process used by the project to another process.

Select a target process

Agile

⚠

Warning! After changing the process you must manually update your work items and board settings or they will appear broken. We will remind you at the end of the third step.

3.8 Crear un sprint

Thank you for trying the new boards hub preview. If you experience any issues, please [report the bug](#). If your issue is blocking, you can disable the preview by following [these steps](#).
